

Airport Procedures & Frequencies

Destin Airport

Lies within Eglin Class D airspace – Contact Eglin Clncl Del (121.6/ 127.7) for squawk prior to takeoff. VFR Traffic Pattern RWY 14/RWY 32: Left hand traffic, altitude 1000’ MSL
VFR Departures RWY 14: Maintain VFR S. of coastline at or below 1000’ MSL until in contact with Eglin Departure. RWY 32: Execute left downwind departure w/in 1 mile of DTS, then maintain VFR S. of coastline at or below 1,000’ MSL until in contact with Eglin Departure (Eglin Departure Freq. 132.1)

WARNING – High Density N-S Corridor Airspace 1 NM north of airport – requires entry clnc

Bob Sikes (Crestview) Airport

CAUTION – High volume of military training aircraft transiting the Crestview area
VFR Traffic Pattern RWY 17/RWY 35: Left hand traffic, altitude 1200’ MSL

WARNING – High Density N-S Corridor Airspace 2.5 NM South of airport – requires entry clnc

Fort Walton Beach, Destin and Crestview Area

Mid-Air Collision Avoidance (MACA) Program Enhancing Flying Safety in Northwest Florida

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited 96TW-2023-0049.

Fellow Aviators,

We are providing this brochure to assist you in flying safely and legally in the crowded skies surrounding Fort Walton Beach, Destin, and Crestview. Flying activity in this area is very busy, with many different types of aircraft ranging in size from small fighters to huge cargo aircraft. Locally based traffic consists of F-15, F-16, F-35 fighters; C-130, CV-22, C-146 transport aircraft; as well as an assortment of helicopters and smaller fixed wing aircraft. Also, be aware of the increasing number of small to medium size unmanned aircraft being tested on the range. There is extensive transient military and civil aircraft, including jet and turboprop airliners.

The many different types of aircraft have a wide variety of flying altitudes and airspeeds. Because Northwest Florida has one of the densest aircraft populations in the U.S., the potential for mid-air collision is especially high. All pilots, military and civilian, must be aware of this potential danger and apply the *See and Avoid concept* with extreme vigilance, even when flying IFR. Through mutual cooperation and awareness, we can all share the skies safely.

This brochure summarizes 14 CFR Part 93 restrictions as well as preferred arrival and departure routes for Eglin AFB, Hurlburt Field, Duke Field, and local airports such as Crestview and Destin. It does not include flight operations of other military services in the Northwest Florida area, which may also operate in or transit local airspace. However, it is a valuable aid in determining the more hazardous areas for military and civilian aircraft operating in this area. Remember too, Eglin range is used for armament testing to include air released munitions. There are also multiple personnel drop areas throughout the Eglin Test and Training Range (often referred to as ETTR) complex.

Please take a few minutes to read through this brochure, and consider carrying it in-flight. The Eglin and Hurlburt Field Flight Safety offices publish this brochure jointly with coordinated efforts between local airports and FAA representatives. If you have any problems or encounter a situation or area you feel is a safety concern, please don't hesitate to call us. Thank you for sharing our interest in flight safety.

SPECIAL AIR TRAFFIC RULE, F.A.R. PART 93
EGLIN/VALPARAISO TERMINAL AREA, FLORIDA
(VFR OR IFR CONDITIONS)

A SPECIAL AIR TRAFFIC RULE, F.A.R. PART 93, REQUIRES PILOTS TO OBTAIN AN ATC CLEARANCE/ADVISORY PRIOR TO ENTERING AND OPERATING WITHIN THE EGLIN/VALPARAISO TERMINAL AREA.

← CLEARANCE REQUIRED PRIOR TO ENTERING NORTH/SOUTH CORRIDOR
CONTACT EGLIN ON 124.05
RECOMMENDED N/S ROUTINGS: 3500' OR ABOVE

← ADVISORIES REQUIRED PRIOR TO OPERATING WITHIN EAST/WEST CORRIDOR
CONTACT EGLIN ON 132.1
RECOMMENDED E/W ROUTINGS: BELOW 8500'

(HI-DENSITY JET TRAFFIC 3000' AND BELOW)

EGLIN E MOA
OVERLIES ALL EGLIN/VALPARAISO RESTRICTED AREAS AND SPECIAL AIR TRAFFIC RULE, PART 93, 0600-2100 INTERMITTENT MON-FRI, OTHER TIMES BY NOTAM.
SURFACE TO BUT NOT INCLUDING FL 180
CONTACT EGLIN APPROACH CONTROL 132.1
RADAR ADVISORY SVC AVBL DESTIN ARPT

E-W (Coastline) Corridor
Must establish/maintain two-way communication with Eglin Approach within airspace
(Frequency 132.1)
Note: Hurlburt & Eglin Class D airspace extends into corridor

N-S Corridor
Must receive clearance from Eglin Approach prior to entering 14 CFR Part 93 Airspace (Freq 132.1)
Note: Encompasses Hurlburt, Eglin, & Duke Class D airspace (as high as 2700') Airspace starts 2.5 nm S of Crestview/1 nm N of Destin airport

Eglin Radar Control Facility operates 24/7
